

Bursa Bursa-Pastoris and Bursa Heegeri Biotypes and Hybrids (Classic Reprint) (Paperback)

Filesize: 2 MB

Reviews

Extensive guideline! Its such a great go through. It is definitely basic but surprises in the 50 % of the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Fernando Hahn)

BURSA BURSA-PASTORIS AND BURSA HEEGERI BIOTYPES AND HYBRIDS (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Bursa Bursa-Pastoris and Bursa Heegeri Biotypes and Hybrids Among the species now being studied, one that has very early yielded results of interest in this connection is the common shepherd s-purse of our dooryards. *Bursa bursa-pastoris* (L.) Britton. *Bursa* (*Capsella*) *bursa-pastoris* is known to the taxonomist as an exceedingly variable species, which seems to have been brought to this country from Europe, but which is now naturalized and almost universally distributed throughout the North Temperate zone. So strikingly different, qualitatively, were the characters of different individuals observed growing side by side in nature that it was difficult to believe that they all belonged to a single series of fluctuating variations, and when the opportunity offered to make pedigree-cultures this species at once suggested itself as favorable material. This thought was based not alone upon its apparent polymorphism, but also upon its hardiness, ease of culture, and the impossibility of its having been subjected to any of the artificial conditions of isolation, crossing, etc., which are usually thought to render plants of economic value unfit to give information regarding the behavior of plants in nature. No one has ever attempted to improve the shepherd s-purse, and although its rapid extension over its present great range is undoubtedly dependent upon the agency of man, both in supplying suitable habitats and more directly in the transportation of the seeds, yet in performing these operations his work has been wholly unintentional, and he is therefore to be classed with the other accidental agents of nature, thus leaving to *Bursa* the solution of its problems of maintenance, extension of range, and evolutionary progress, under conditions which are fundamentally like those that must be met...
