paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Publisher: National Defence Industry Press Pub. Date :2010-03-01. CAD/CAM System Tools is an advanced digital manufacturing technology an important component of the system. Book design and intelligent digital parts CNC machining task-oriented programming, focusing on tools for digital systems CimatronE applications. Book, a selection of dozens of examples of the work, including air blades, impeller parts, home appliances products, introduced the form of digital components, sub-module design, electrodes design, NC programming and work experience. Space for a slant-hole (surface) and deep cavity mold parts processing difficulties, a special presentation on space angle calculation process, 5-axis machining and mold parts positioning 5-axis programming process. All instances of the part drawing two-dimensional drawings that are in line with actual production plant, but also for learning parts design and NC programming practical applications to enhance the concept of space training, gain work experience and enhance their professional knowledge. As a result of Four Satisfaction guaranteed, or money back.
