AUTOMATIC EXTRACTION OF VECTOR REPRESENTATIONS OF LINE FEATURES

LAP Lambert Academic Publishing. Paperback. Condition: New. 204 pages. Dimensions: 8.7in. x 5.9in. x 0.5in. This book describes the development and evaluation of a system that can classify line features from remotely sensed images in raster format using neural networks and transform the classified features into vector representations automatically using a new Square Scan Algorithm (SSA). The SSA was designed to deal with branching and crossing lines in order to transfer the line features in raster images into vector representations automatically....
